THE 2030 AGENDA FOR SUSTAINABLE DEVELOPMENT

On January 1, 2016, the 17 Sustainable Development Goals (SDGs) of the 2030 Agenda for Sustainable Development — adopted by world leaders in September 2015 at a historic UN summit — officially came into force. Over the next fifteen years, these new Goals that universally apply to all countries will dedicate efforts to ending all forms of poverty, fighting inequalities and tackling climate change, while ensuring that no one is left behind. The SDGs, also known as the Global Goals, are built on the success of the Millennium Development Goals (MDGs) and aim to go beyond all limits of poverty. The new Goals are unique in that they call for action by all countries, poor, rich and middle-income, to promote prosperity while protecting the planet. They recognize that ending poverty must go hand-in-hand with strategies that build dynamic, economic growth and address a range of social needs including education, health, social protection and job opportunities, while tackling climate change and environmental protection.
